

Project Description

The Google Excel Sheet Dashboard is an AI-powered application that analyzes data from an uploaded Excel sheet and automatically generates a dashboard. The dashboard provides visual charts, key insights, and recommendations to help users understand their data easily.

Features

- Upload an Excel file
- Analyze spreadsheet data
- Calculate Total Sales
- Display Sales by Product
- Display Sales by Category
- Show Monthly Sales Trend
- Generate Bar Chart
- Generate Pie Chart
- Generate Line Chart
- Display Key Insights
- Provide Recommendations

Tools Used

- Claude AI
- Microsoft Excel
- GitHub

Prompt Used

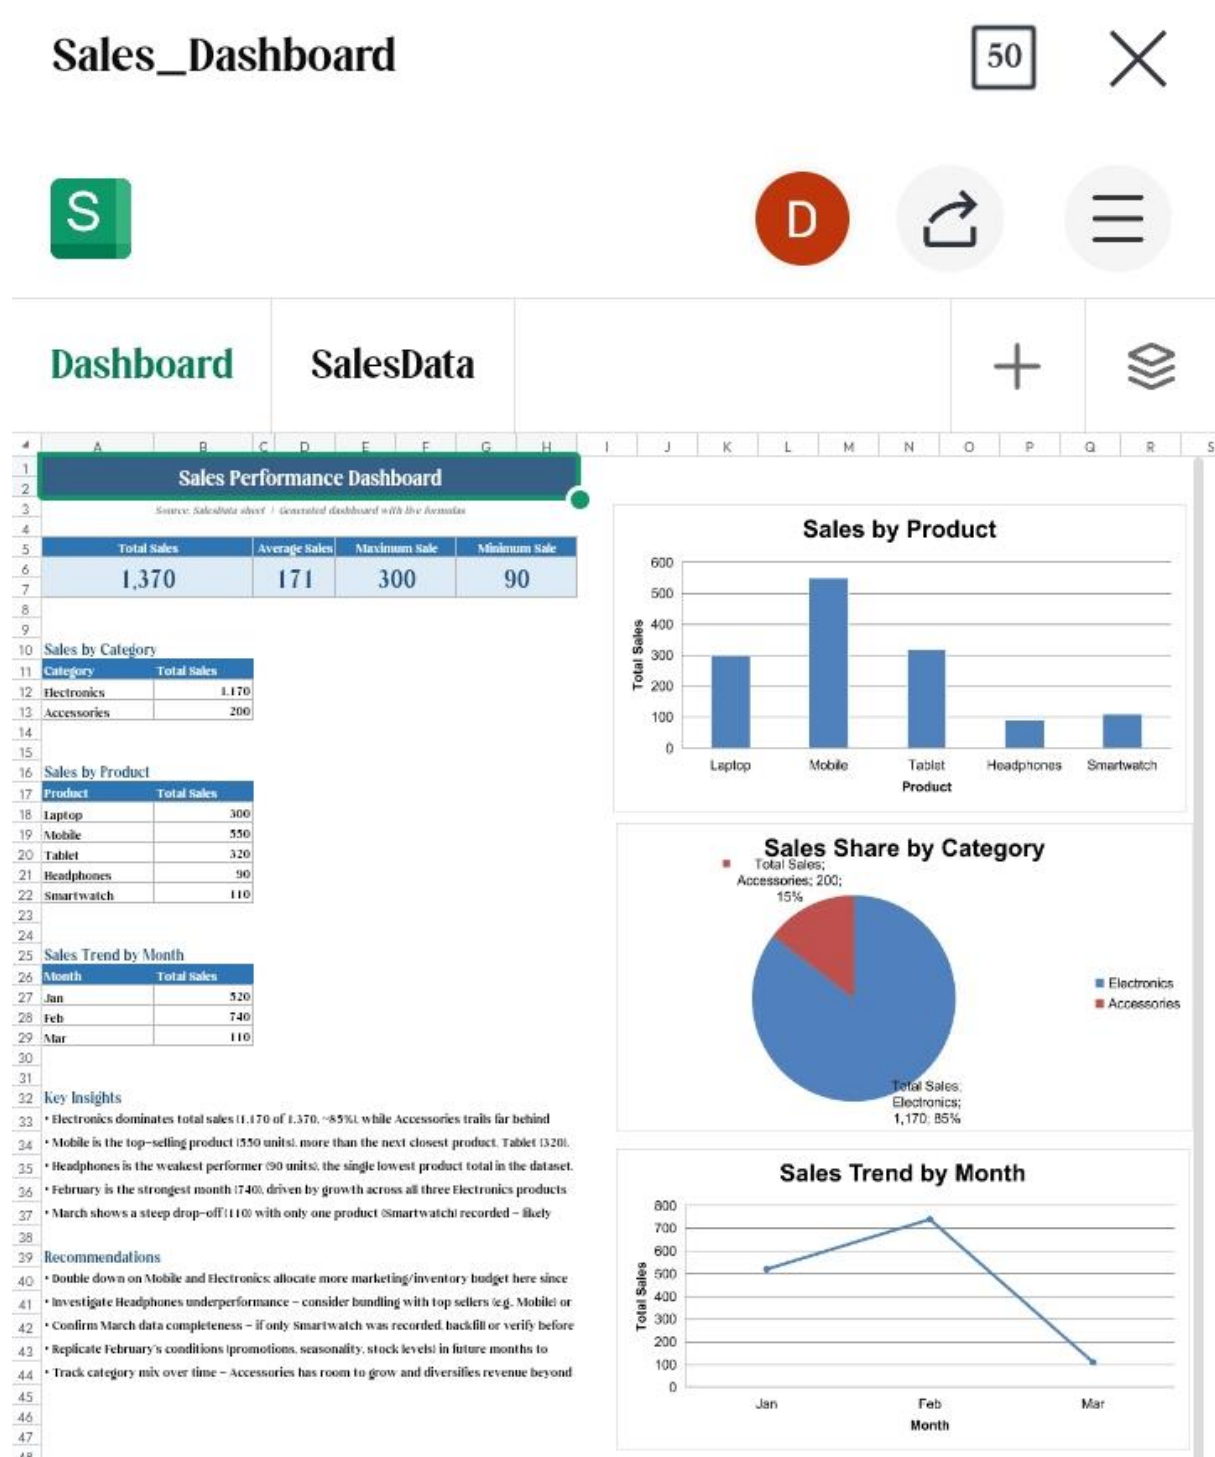

Analyze the uploaded Excel file and create a dashboard.

Requirements:

- Read all data.
- Calculate total, average, maximum, and minimum values.
- Identify key insights.
- Generate a Bar Chart.
- Generate a Pie Chart.
- Generate a Line Chart if applicable.

- Provide a summary and recommendations.
- Display the results in a professional dashboard layout.

Output

The application successfully analyzed the Excel data and generated:

- Total Sales
- Sales by Product (Bar Chart)
- Sales Share by Category (Pie Chart)
- Sales Trend by Month (Line Chart)
- Key Insights
- Recommendations

Conclusion

This project demonstrates how AI can automatically analyze Excel data and present it in a clear and interactive dashboard. It helps users quickly understand business performance through charts, insights, and recommendations.
